Why TeamRetro?

We take care of the process, so you can take care of your team.

TeamRetro helps Scrum Masters and Agile teams deliver high quality retrospectives and health checks that better identify opportunities for improvement. Build happier teams and get more value of your meetings while generating useful insights on a platform that is safe, secure and reliable.

Delivery high caliber meetings

- Guided and facilitated retros and health checks
- Customisable templates from design to delivery
- Action focused for continuous improvement
- Facilitator options to keep the meeting relevant

Time saving features

- Intuitive design
- Auto-suggestion to group similar ideas
- Presentation mode to keep everyone in sync
- In built timer and presets
- Schedule future or recurring meetings
- Publish actions and reports with one click

Build psychological safety

- Anonymous brainstorm and comment options
- Independent dot voting
- Shape team agreements to capture agreed behaviours
- Run psychological safety checks

Use In built templates or create your own

- Access industry or community templates
- Create your own templates for the team or for everyone
- Design your own retro or health check

Enterprise level security

- SoC 2 Certified
- GDPR Compliant
- Secure platform and infrastructure
- SSO/SAML supported
- SCIM for team management
- API supported
- EU and US hosting options
- Domain capture

Create and track meaningful actions

- Easily propose and add actions
- Assign owners, importance and due dates
- See all actions across all meetings in a single list
- Integrated workflow - Jira, MS teams, Slack etc.

Discover Insights to support your team

- Track actions from creation to completion
- Uncover common themes and issues
- Monitor team health over time for all teams
- Explore team sentiment in meetings
- Get a snapshot of team happiness and activity
- Track return on time invested
- See key metrics on agile activity and practice

Run team health checks

- Survey and track team happiness or agile metrics
- Use common health check models or design your own
- See a heat map of health check ratings
- See breakdowns and trends by dimension
- Analyse results - mean, mode, range and deviation

Achieve leadership goals

- Transform and support agile practices
- Build team culture, happiness and discipline
- Promote continuous improvement and accountability
- Foster team safety and engagement
- Get insights, trends and reports to support teams
- Improve meeting cadence, capability and confidence
- Secure and private platform
- Improve meeting efficiency and effectiveness
